

Rural Operation

Land Navigation and Team Movement

The Rural Operation Land Navigation and Team Movement course is designed to teach the student how to navigate with a compass in a wooded environment. This course will also teach the student how to move tactically through a wooded environment as an individual or part of a team. Students will be required to complete several land navigation course exercises. The student will be additionally tested on tactical movement skills learned during this course.

Note* This course should precede Rural Operations – Tactical Movement. Can be taken as a stand-alone course or combined with Rural Operations – Tactical Movement course.
